

Guidelines for Donor

Dear All,

"You will save Life". It is a unique service rendered to humanity. It gives a feeling of supreme satisfaction that no words can describe. You have to experience it at least once to know it.

1. Blood donation is the noblest donation.

When you donate blood you will be doing one of the most amazing things anybody could dream of,

2. Who can donate Blood?

- Age 18 to 60 years.
- Weight above 45 kilogram.
- Should not have suffered from Malaria, Jaundice like diseases in last one year.

This can be used according to specific need of the patients. It is quite possible that patient may need one component of blood whereas other components are not required to be transfused. This also reduces the possibility of adverse reactions.

HUMBLE APPEAL

Please donate blood at first opportunity and take part in service to humanity. Blood is needed round the clock and is a continuous process. So please help us for providing blood services effectively by donating blood.

"Donate Blood Save Life."
