BACKGROUND

COVID-19 has been declared as a '**National Disaster**' by the Government of India. From 10,000 confirmed cases in April, India's figures rose to 1.2 million cases in July making the country the third most affected country in the world. So far, 28,732 people have lost their lives to the disease and more than 7.50 lakh people have successfully recovered. India's confirmed cases figure per million now stands at 877. Maharashtra tops the list from the beginning for having the highest number of cases in the country.

With the pandemic came the stigma, superstitions, and fear about the disease among people. During the lockdown, most of the private clinics and hospitals were closed with no access to ailing patients even for basic health check-ups. The increasing patient count led to an increment in the number of red zones, hotspots and containment zones all over the country. Citizens suffered due to a lack of access to primary medical care in the initial months of lockdown. Even when the country moved towards unlocking, people were wary of coming out due to fear of contracting the virus.

THE CONCEPT OF "MOBILE DISPENSARY SEVA"

The concept of Mobile Dispensary SEVA (MDS) "Doctor at your doorstep" was conceived by Shri Shantilal Muttha, founder of BJS, when he observed that most of the physicians had closed their clinics due to the lockdown, fear of not able to control social distancing at their clinics and for the fear of contracting the SARS-COV-2 virus.

"Doctor at your doorstep" was the need of the hour during the national emergency and the unprecedented lockdown. The lockdown exposed citizens to more health risks, especially children, elderly, women and comorbid patients. People were unable to get out of their homes, and almost all local clinics and hospitals remained closed.

MAIN OBJECTIVES OF "MOBILE DISPENSARY SEVA"

- Provide free doorstep medical aid to needy patients during the lockdown.
- Through health checkups, identify suspected patients and refer them to government hospitals for further tests.
- Early detection of COVID-19 patients to contain the spread.
- Treat patients with free medicines for COVID-19 like symptoms such as fever, cough and cold and other general ailments.
- Control the spread of the virus that may dramatically increase due to the number of people flocking at Govt. hospitals even for minor symptoms.
- Increase community awareness about the prevention and the spread of the COVID-19 disease and reduce the fear.
- Assist the local administration by conducting maximum doorstep health checkups and reduce their workload.
- Save numerous lives and help contain the community spread.

A citizen is screened for fever

PHASE I – MOBILE DISPENSARY SEVA (DOCTOR AT YOUR DOORSTEP)

Let us take you through the journey of Phase I of Mobile Dispensary SEVA that began on 1st April 2020 in Pune.

Closure due to lockdown

1. THE NEED FOR MOBILE DISPENSARY SEVA

BJS assessed the horrific situation of the lockdown and the negative impact it was having on the health of citizens. Due to the lockdown, people were unable to step out of their homes for basic health check-ups. They suffered for not getting timely treatment for general illness and it posed a serious threat of turning in to severe complications.

Moreover, the suspected corona patients could only be identified through maximum health check-ups and early detection was the only way to help save lives and contain the increasing spread. Therefore, BJS felt the need to immediately start the SEVA.

2. ANTICIPATED CHALLENGES

Several challenges were anticipated that needed to be overcome for successful start and continuity of Mobile Dispensary SEVA, such as the availability of below -

Sufficient number of Doctors for accompanying dispensaries

Sufficient quantity of PPE Kits for Doctors and their team

Availability of Vans to be used as Mobile Dispensaries

Availability of Medicines and Medical Equipments

Availability of Volunteers

Program Management

3. PILOT IMPLEMENTATION IN PUNE

BJS is headquartered in Pune. Hence, the organisation decided to pilot the project on our home ground in Pune. Within 4 days it was launched in PCMC also.

MDS launched in PMC on 1st April 2020

MDS launched in PCMC on 4th April 2020

4. APPROVAL FROM MAHARASHTRA STATE GOVERNMENT

Shri Shantilal Muttha, founder of BJS, initiated a discussion with the Hon'ble Chief Minister of Maharashtra, Hon'ble Health Minister, Secretary, Government Authorities and the Local Authorities in Pune and shared the project concept. After detailed discussions, all the necessary clearances were received immediately to start the MDS project.

5. FORCE MOTORS INITIATED SUPPORT TO MOBILE DISPENSARY SEVA

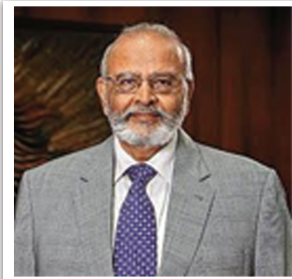

At this time of national crisis, Shri Abhay Firodia and Shri Prasan Firodia decided to spend Rs.25 Crore for supporting the fight against COVID-19 and gave priority to BJS. The budget allotted to BJS was completely utilised but they

continued their support to BJS in aiding the Mobile Dispensary Seva through-out Maharashtra. Their unconditional acceptance to all the proposals – MDS Pune, MDS Rural Maharashtra and the Pune Swab Centre has been their biggest contribution.

A note of thanks to Firodia family

Shri. Navalmalji Firodia

Shri. Abhay Firodia

Shri. Prasan Firodia

On behalf of BJS, I would like to take this opportunity to express our gratitude to the Firodia Family.

BJS and Firodia family's association dates back almost 3 decades and involves 3 generations.

With love and remembrance, I express my gratitude to Late Shri Navalmalji Firodia, who has been the backbone of BJS since the inception. He was a mentor, an idol and a guiding force for me in this long difficult journey of social service.

The legacy continues with Shri. Abhay Firodia's uncompromised support to BJS in effectuating relief in drought-hit Ahmednagar last year.

At this time of national crisis due to COVID-19, Shri. Abhay and Prasan Firodia have again extended their complete support to BJS in aiding Mobile Dispensary Seva through-out Maharashtra.

To date, we have already treated around 25,000 patients. Now, BJS & Force Motors aim to provide treatment to further 500,000 patients under this mission.

With the support from the Firodia family, we can certainly bring about a positive impact in health and well-being of our society.

Thank you for your continued support.

- Shantilal Muttha

BJS and Force Motors banners used for the vans and camps

6. START OF MOBILE DISPENSARY SEVA IN PMC AND PCMC

BJS-Force Motors' pilot project of Mobile Dispensary SEVA started in Pune on the 1st of April in PMC with 11 vans and on the 4th of April in PCMC with 5 vans.

The vans accompanied by a doctor, nurse, attendant and volunteer reached out to the population living in slums, temporary shelters, or old-age homes. It focused on senior citizens,

children and anyone needing medical care.

During the first week of April, the mobile dispensaries could check at least 2500 people per day. The data collected also helped the government to create a bank of those checked for COVID-19 and eliminate rechecking.

a. Customization of Dispensary Vans

- BJS retrofitted the vehicles like Tempo Traveller and School Buses to be used as ambulances. It had space for a stretcher, chairs for the patient and doctor, and stock of medicines.
- The vehicles were rebranded with banners of BJS & Force Motors "Doctor at your doorstep" initiative.
- Every Ambulance was well equipped with medicines and equipment.
- Loudspeakers were fitted in all van for making announcements.

MDS crew in the van

A doctor prescribing medicine

A citizen seeking medical help

An announcement on the loudspeaker

b. Human Resources

- A doctor and assistants were provided in each van.
- A BJS volunteer was assigned to each van.

All the doctors and their assistants were provided with PPE kits for their safety.

Circles marked for social distancing

A patient receives medicine from the doctor

c. Rules & Regulations adhered to

BJS followed the government norms of social distancing as well as the guidelines issued by the local authorities. BJS prepared and shared guidelines with all the doctors as well as the volunteers on self-safety measures.

d. Process

A step-by-step procedure was adopted to achieve the objectives of the project.

- The Municipal Commissioner announced the opening of the project for Public Awareness and then the vans were sent to various places for conducting health checkups.
- Locations would be fixed a day before by the local authorities, and BJS would be informed accordingly.
- Upon reaching the assigned area, volunteers made an announcement on loudspeakers for people to come for health checkups.
- Chairs were placed at safe distances of 2 feet for the patients coming for checkup.
- Doctors conducted health check-ups for the patients and gave them the required medicines free of cost.
- Data of the people who came for the visit was maintained.
- Data of suspects referred for swab tests were shared with the municipal corporation.

e. Scaling of Mobile Dispensary SEVA in Pune

There was a dire need to scale up the project in Pune considering the need of the hour. More dispensaries would require a large arena for controlling the day to day administration as parking, fumigation of the vans, and daily inventory was challenging.

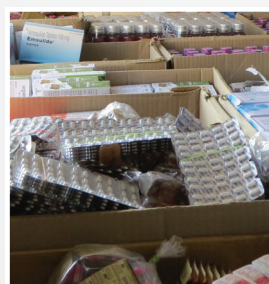

Shri Shantilal Muttha visits the depot

f. Setting up of Depot for Centralised Operations

Shri Amit Lunkad, Director of Lunkad Realities and an individual of high reputation stepped in and took the responsibility of supporting the mission with his existing professional team and an ongoing site as a Depot for the vehicles.

The entire operations - vehicle parking, cleaning and fumigation, storing the required medicines and equipments and implementation of the entire operations were done under his able leadership.

The operations in Pune were successfully scaled up with 84 SEVA dispensaries which operated in different and the most affected areas of Pune and Pimpri Chinchwad area.

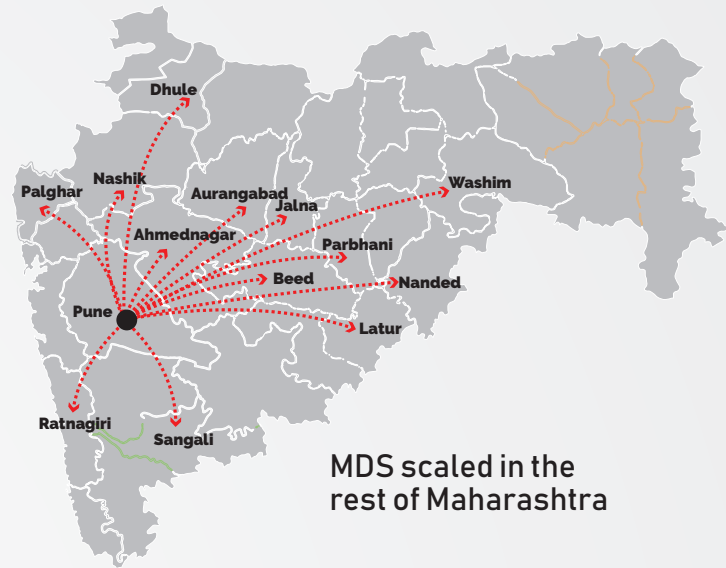

Fumigation, medicines, medical stock and supplies arranged in vans

7. SCALING OF MOBILE DISPENSARY SEVA IN THE REST OF MAHARASHTRA

The first case of the COVID-19 pandemic in the State of Maharashtra was confirmed on 9th March 2020. Maharashtra accounted for nearly one-third of the total cases in India as well as about 40% of all deaths then hence the need to scale the project. MDS was running successfully in Pune. BJS was confident of scaling MDS with its effortless and seamless nationwide presence of office bearers.

Shri Abhay Firodia whose philanthropy **stood strong** in its fight against the coronavirus outbreak backed BJS to run as many as dispensaries in rural Maharashtra.

Consecutive online trainings were arranged by BJS. Thorough audio-visuals training was imparted for running the dispensaries as well as safety measures to be taken by doctors, nurses, volunteers and everyone associated with the project.

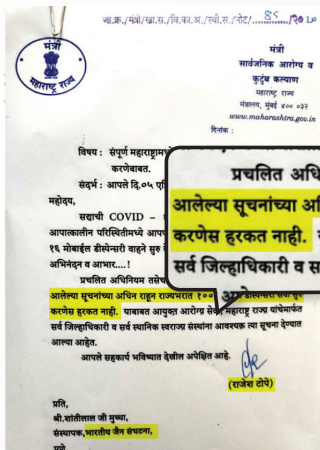

MDS scaled in the rest of Maharashtra

8. GOVERNMENT APPROVAL

All the necessary government permissions and approvals were taken by the respective administrative departments. The vans were already conducting health checkups in Pune and Pimpri-Chinchwad supporting PMC and PCMC. Later on, they were introduced in Nashik, Rajguru Nagar and Solapur.

BJS later received permission from the state government to deploy 100 more such vans all over Maharashtra.

Approval letter from State Government for 100 dispensaries

9. IMPLEMENTATION IN THE REST OF MAHARASHTRA

BJS has gained expertise after working in many disasters along with its strong network of volunteers. The organization has always involved the local government administration and worked with them hand in hand. Shri Nandkishor Sakhla a Senior National Council Member of BJS who has been working for the last 30 years was given the responsibility to lead this project in the entire Maharashtra. Shri Deepak Chopda from Nashik assisted him along with other BJS senior members. A team was formed to understand the ground level needs with the involvement of health officers and local authorities.

The entire BJS team of volunteers played a very important role and worked relentlessly under the leadership of Shri Nandkishor Sakhla. He established relations with the respective Commissioners, Collectors, and the local people who whole-heartedly supported the mission.

10. OPENING OF SWAB CENTRE IN PUNE

During its ongoing MDS operations, BJS noticed a panic among the suspects to get a Swab test done. The BJS ground team of doctors and volunteers had already reached out to the masses and earned the trust of the patients. Hence, BJS decided to do SWAB testing of the suspected patients identified through the MDS and refer only the COVID-19 positive patients to the corporation thereby controlling the spreading of the virus to some extent. Accordingly, BJS started the planning and execution of this activity as under -

- BJS signed an MoU with the Pune Municipal Corporation for opening a Swab Centre in Pune.
- BJS identified a private agency approved by the Government for SWAB testing.
- BJS set up a well-equipped Swab centre in Yerawada with an up-to-date infrastructure for swab testing under a secure and safe environment. The identified private agencies then deployed their team of medical practitioners and doctors for conducting the swab tests at these centres.
- All suspected patients identified after a check-up by the Mobile dispensaries were referred by the respective doctors to this centre for further investigations.
- BJS hired auto rickshaws to bring patients to the centre and drop them back (between pick and drop of every patient at the govt. hospital, the auto was completely fumigated).
- The senior doctors at the centres checked the slip issued by the doctor at the MDS and decided whether swab testing is required. If required, the testing was done at the centre.
- Reports of the Swab test were forwarded by the swab testinglab to the Corporation as per the stipulated guidelines laid by ICMR.

BJS-Force Motors to carry out COVID-19 tests of suspected patients identified through Mobile Dispensaries at its own expense.

Agreement signed with PMC

BJS-Force Motors have already conducted health checkups of over 3 lakh patients in Pune. Many of the those referred to government hospitals as Covid-19 suspects were reported positive by health authorities. Hence, BJS-Force Motors have decided to carry out COVID-19 tests at its own expense hereon.

Agreement signed with PMC on 11th May 2020

AGREEMENT
This Agreement ("Agreement") is executed on this 14 day of May 2020 at 7:00 pm

BY AND BETWEEN

KISNAA DIAGNOSTICS PRIVATE LIMITED, a private limited company incorporated under the Companies Act, 1956, having its registered office at Pavananagar, Chinchwad, Pune - 411033, represented by its authorized Signatory Mr. Pallavi Bhatevra (Jain) (hereinafter referred to as "KDPL", which expression shall unless it be repugnant to the context mean and include its successors and permitted assigns) of the FIRST PART;

AND

Bhartiya Jain Sanghatana Mobile Dispensary, a Non-Governmental Organization registered under applicable laws, represented through its authorized Signatory, Shri Shantilal Gulabchand Mutha (PAN - AAATB1304L) address at Bhartiya Jain Sanghatana, Level 3, Mutha Chambers II, Senapati Bapat Marg, Pune-411016 (Maharashtra), India (hereinafter referred to as "Client", which expression shall unless it be repugnant to the context mean and include its successors and permitted assigns) of the SECOND PART;

KDPL and Client shall be individually called as "Party" and collectively as "Parties".

WHEREAS:

- KDPL is engaged in the business of providing diagnostic services to patients through its own Lab or tied up other Labs. KDPL is also providing COVID-19 testing facilities through its NABL accredited and ICMR approved laboratory in Pune.
- Client is a Non-Governmental Organization, providing "Mobile Dispensary Seva" in various cities across Maharashtra and other states of India. During this COVID-19 Pandemic, client has shown its willingness to extend the scope of services through its organization as aid to the citizens of our country by providing COVID-19 sample testing (RT-PCR swab testing) through an ICMR approved Laboratory and has approached KDPL for the same.
- Based on the representations, warranties and indemnities of each Party, the Parties are entering into this Agreement to record the detailed terms and conditions for the purpose of this agreement.

1. DEFINITIONS:

- In this Agreement, the following capitalized terms shall have meanings as defined herein:

- 1.1.1. "Agreement" shall mean this Agreement, Annexures, addendum, attached hereto;
- 1.1.2. "Diagnostic Services" shall mean and include pathology services inter alia testing of COVID-19 Samples etc.;
- 1.1.3. "Sample" shall mean and include the sample/specimens of saliva, nasal swabs, oral solution, blood, serum, plasma, urine, sputum, stool, tissues, body fluids, etc. of patients;

2. ENGAGEMENT AND OBJECT:

- 2.1. KDPL will provide the sample collection and processing service to the suspected Patients that are already referred, screened and prescribed after due examination by the panel of doctors of the Client.

12. THE OUTCOME OF PHASE I - MOBILE DISPENSARY SEVA

From 1st April to 30th June, the mobile dispensaries conducted health checkups for more than 15 lakh citizens with the help of 262 dispensaries out of which 20,494 COVID suspects were referred to government hospitals.

A total of 808 patients were identified positive through BJS MDS intervention.

Many hotspots were particularly targeted for doorstep health checkups. This tremendously helped the government in containing the spread of the virus especially in slums and densely populated areas of the cities.

It helped in controlling the community spread through the timely detection of suspected patients. Moreover, it helped to break the chain and reduce the mortality rate to some extent.

13. CHALLENGES OVERCOME BY BJS

a. Availability of doctors

BJS soon realized the challenge of the availability of doctors in the ongoing pandemic. BJS approached the Corporation, despite sourcing doctors from govt. bodies, it was sufficient for operating only 20 vans. So, BJS reached out to organizations of doctors like IMA, Indian Dental Doctors Association and Medhi Jain and got a few doctors. Finally, BJS gave an advertisement on television about the requirement of doctors and also appealed through social media and WhatsApp to give assurances to all the participating doctors about taking proper care of their safety. After attempting all the above various options and resources BJS was still unsuccessful in getting doctors.

At this crucial point, BJS hit upon the idea of appealing to PMC Corporators to provide doctors from their Wards. They were assured of the doctors' safety through various social media platforms, audio-video clips, etc. After this change in strategy and a rigorous follow-up with all the mediums, BJS was successful in getting the required number of doctors.

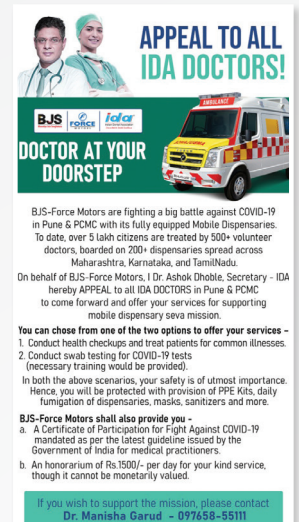

A team of doctors in PPE suits

c. Availability of Mobile Dispensary Vans

- Sourced through personal contacts, ambulance providers, school van providers, travel agency vans, etc.
- Drivers were assured of all the protection and facilities.

Drivers and volunteers pose for a photograph with Shri Shantilal Muttha after a briefing session

Appeal to Doctors

Doctors ready to start their day with mobile dispensary

b. Availability of PPE kits

- From 1st April to 15th April, BJS procured all the above safety products by paying a higher demand price.
- Family friends of Shri Muttha provided the safety products.

d. Availability of Volunteers

- From 1st April to 15th April, BJS staff and office bearers were running the entire operations of the Mobile Dispensary SEVA.
- BJS approached the corporators to provide local volunteers from their areas. This option worked well.

e. Program Management

The management of this program was difficult during the lockdown. On this front, Lunkad Realty came forward and took the complete responsibility of starting a fully functional centralised depot at Vimannagar in Pune. **Shri Amit Lunkad and Shri Rahul Dagalia** along with their team set up Standard Operating Procedures (SOP) for the depot (today which is a standardized practice across all the cities where MDS operates).

Mr. Amit Kantilal Lunkad

Mr. Rahul Dagliya

Standard Process and Duties set by Shri Amit Lunkad

8.00 am – 8:30 am	Sanitisation of all the vans
8:30 am – 9.00 am	Refilling all the vans with Medicines. PPE kits, Infra-Red guns and Oximeter
9.00 am onwards	Reporting of all the doctors, volunteers and drivers
9.00 am	Lunch packets distribution for all the field staff
9:30 am onwards	Tea and breakfast for all the staff
10.00 am	Reporting sheets were handed to the drivers and they would leave to the assigned area.
10:30 am – 1.00 pm	1 st Mobile camp would be conducted
1.00 pm – 1:30 pm	Lunch
2.00 pm – 5:30 pm	2nd Mobile camp would be conducted
6.00 pm onwards	<ul style="list-style-type: none"> • Return of the vans at the depot, the vans would be fumigated as soon as it entered the depot by a team of 2 members wearing PPE kits • Handing over the reporting sheets to the MIS coordinator who would check and fill up all the data in the mobile app.

Detailed cognizance of every activity was taken keeping safety measures in place.

In addition to this hurricane task, the entire procurement of medicines and equipment, inventory, field operations, program management, checking and forwarding the invoices for payments, doctor management, MIS reporting, and team management was done by Lunkad Realty.

14. BOTTLENECK IN THE JOURNEY

The MDS crew waiting for the citizens

Through our rigorous ground-level experience, we learned that bringing citizens to Mobile Dispensaries for health checkups was extremely challenging.

More than that, **the going of suspected patients to government hospitals was one of the biggest challenges in this mission.** Because the suspected patients must undergo swab tests within 24 hours.

These patients are reluctant in getting swab test done, which causes increased spread in the surrounding areas. This negligence also hinders their chances of early detection, which then results in critical conditions of these suspected patients.

“The dispensary project’s success is depended on suspected patients going to government hospitals for swab tests, within 24 hours.”

15. THIRD-PARTY IMPACT STUDY

The COVID-19 health crisis has been unprecedented in its impact on lives. Hence, BJS decided to conduct an external study to analyze the effectiveness of its intervention. BJS outsourced the study to CPC Analytics – An analytics firm that has been tracking and analyzing the emergence of COVID-19 cases across Maharashtra and other states.

About the study

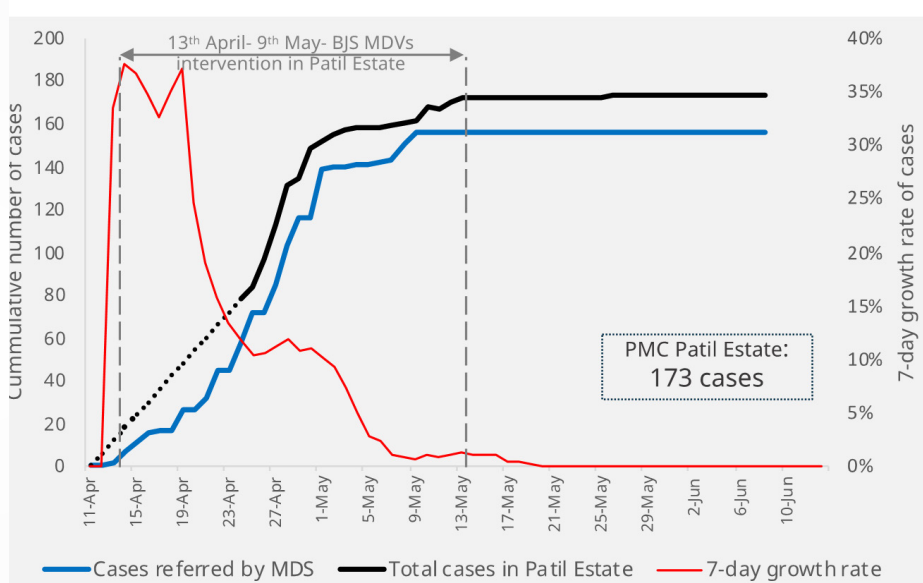

Title: Analysing the impact of the joint intervention of Pune Municipal Corporation (PMC) and Bharatiya Jain Sanghatana (BJS) in the fight against COVID-19 in Pune City – Mobile Dispensary SEVA (MDS).

“CPC Analytics through this report aims to understand the intervention of grassroots pandemic response teams that focus on the process and maximizes the coverage of the screening net. It aims to understand if this helps control the spread of disease and if early detection prevents avoidable deaths” – CPC.

CPC Findings

1. MDS interventions in Patil Estate

At the beginning of the pandemic, Patil Estate was one of the biggest and fastest-growing hotspots for COVID in Pune, contributing to over 62% of the ward's cases. Figure 5 shows that new cases started reducing from the first week of May, the average growth rate of cases reduced from 37% to ~0%, and Patil Estate flattened the curve. In the last one month (between 13th May and 13th June), only 1 new case was detected. The intervention was hence been extremely effective in breaking the chain and limiting the spread of COVID. The intervention by BJS MDS helped flatten the curve in an area that had many cases and slum settlements. The extensive screening and referral method helped early detection, isolation and, breaking the chain.

A graph showing MDS intervention in Patil Estate

2. The Case Fatality Ratio

It was observed that PMC detected 8,777 positive cases and the count of deceased patients was 413. During the intervention of BJS MDS, 755 positive cases were detected and the count of deceased patients was 3.

PMC data shows a CFR of 4% whereas CFR for BJS data is 0.4%. The CFR of positive patients detected by BJS is considerably lower than the CFR of all positive patients in PMC. This could be due to the early detection of cases.

3. CPC Conclusion

The work done by BJS in Pune in targeted locations has significantly aided the fight against COVID-19. Overall, the extensive screening and referral method helped early detection, isolation and breaking the chain. The early detection of positive cases helped control the transmission and also in reducing the number of deaths.

16. CASE STUDY – MALEGAON

Malegaon emerged as a major COVID-19 hotspot in the first week of May. Moreover, it was considered to be one of the most sensitive areas in the country. This caused a serious concern for the government and the local administration. The daily spike in positive cases triggered the need for immediate attention.

Hence, BJS decided to intervene in Malegaon. During that time, the number of cases had reached its peak in Malegaon. BJS deployed 15 Mobile Dispensaries for Malegaon, but they faced tremendous challenges in the first few days. The dispensaries stood still beside the barricades and they could not enter the internal areas due to severe restrictions. Many other difficulties and local issues halted the activity.

Considering the criticality of this situation, Nashik's District Collector took interest and held a detailed discussion about this initiative with Malegaon Municipal Commissioner and our team. Health Minister too visited Malegaon to assess the situation.

The BJS volunteers worked rigorously for the first two to three days to coordinate with all local leaders, doctors, community representatives, social workers, NGOs, media, and the administrative staff. Through their efforts, everybody came together and decided to work unanimously on this project.

Through this collective effort, from 3rd May 2020 to date, we could conduct health checkups for more than 95,000 citizens with the help of 15 mobile dispensaries in Malegaon. 1,528 suspected patients are referred to the government hospital for further tests. The rigorous health screenings helped in identifying the suspects and thus contained the spread of the disease in the city to a large extent.

Thus, a new positive environment has been created in Malegaon. Taking note of this positive outcome, the Government of Maharashtra recently decided to create a new Plasma Centre in Malegaon and Dharavi.

Working in such a big hotspot and a sensitive area was not an easy task. We worked hand-in-hand with Malegaon Municipal Commissioner. The whole team of Municipal Corporation, Health Workers, Asha Workers, Doctors, Sisters, Nurses worked very systematically in this project.

The work that was being done by all the team was so fascinating that even Shri Shantilal Muttha visited Malegaon on 12th June to appreciate and thank all the warriors for their good work. He also visited COVID care centers to meet the patients.

Health checkups in Malegaon

17. THE EXPANSION OF MOBILE DISPENSARY SEVA

- The SEVA was scaled up across Maharashtra, Tamilnadu, Karnataka and Gujarat with 224 Mobile Dispensaries.
- The project was scaled up to 62 Mobile Dispensaries in the most affected part of the country, "MUMBAI".
- BJS worked in hotspot areas of Dharavi in Mumbai and Malegaon in Nashik district. The cases drastically reduced because of the MDS intervention.
- Considering the alarming rate of the spread of COVID-19, BJS intends to expand this Seva across other highly impacted cities in Maharashtra by starting Phase II "Mission ZERO".

18. PARTNERSHIP WITH STATE GOVERNMENT

BJS aligned with local administration and the state government officials in all its projects.

Taking note of the outstanding work carried out by BJS Mobile Dispensary SEVA, Hon'ble Chief Minister of Maharashtra invited Shri Shantilal Muttha for a meeting. Senior Leader Shri Sharad Pawar, Health Minister Shri Rajesh Tope, Home Minister Shri Anil Deshmukh, Shri Jayant Patil, Aditya Thackeray and Chief Secretary Shri Ajoy Mehta were also present for the meeting.

BJS, CREDAI MCHI & Desh Apnayan consortium takes the biggest responsibility in Mumbai to contribute to the city's fight against COVID-19.

DOCTOR AT YOUR DOORSTEP

On May 15th 2020, Shri Shantilal Muttha convened a high-level meeting with **Hon'ble Chief Minister of Maharashtra Shri Uddhavji Thackeray**, Hon'ble Shri Sharadraoji Pawar, Hon'ble Health Minister of Maharashtra Shri Rajesh Tope, Hon'ble Home Minister of Maharashtra Shri Anil Deshmukh, Hon'ble Minister Shri Jayant Patil, and Shri Aditya Thackeray.

Those present at the meeting also included Chief Secretary Mr. Ajoy Mehta, Health Secretary Shri Vyas, Corona task force head Dr. Sanjay Oak, Principal Secretary to Chief Minister Shri Vikas Kharge and Shri Ajay Kumar.

Upon the request of the government, the consortium will officially launch 75 mobile dispensaries on May 18th, 20.

Hon'ble Chief Minister will formally flag off the mobile dispensaries.

BJS, CREDAI MCHI and Desh Apnayan (BCD) collectively are doing aggressive work in Mumbai to contribute in the city's fight against COVID-19 by extending medical support and thereby reducing the impact and panic of COVID amongst the citizens to a great extent.

On behalf of BCD, Shri Shantilal Muttha had a meeting on 15th May in Mumbai with Honourable Chief Minister of Maharashtra **Shri Uddhavji Thackeray**, Honourable **Shri Sharadraoji Pawar**, Health Minister **Shri Rajesh Tope**, Home Minister **Shri Anil Deshmukh**, Honourable Minister **Shri Jayant Patil** and **Aditya Thackeray**. Also present in the meeting were Chief Secretary **Mr Ajoy Mehta**, Health Secretary **Mr Vyas**, Corona task force head **Dr Sanjay Oak**, Principal Secretary to Chief Minister **Shri Vikas Kharge** and **Ajay Kumar**.

The future action plan of BJS was discussed in the meeting. Shri Shantilal Muttha shared a presentation of work done by BJS in the last 45 days and its outcome till date. The following decisions during the ongoing meeting were taken by BCD after discussing with all the dignitaries.

CREDAI MCHI has opened 8 depots in Mumbai from where all the mobile dispensaries are deployed at various planned areas and locations. The end to end operations of these dispensaries is under the supervision of CREDAI MCHI.

Dharavi and Gorai are the worst affected areas in Mumbai. BCD decided to deploy **25 mobile dispensaries** in Dharavi and **15** in Gorai thereby supporting the government machinery.

Presently, BCD's 35 mobile dispensaries are running in Mumbai.

Accordingly, from **Monday, the 18th of May 75 dispensaries** will be running in Mumbai after formal inauguration of all these dispensaries by the hands of Honourable Chief Minister of Maharashtra **Shri Uddhavji Thackeray**. BCD has geared up to start this operation with high spirits.

The government has assured to extend maximum support to BCD for this activity.

19. PARTNERSHIP WITH VARIOUS MUNICIPAL CORPORATIONS AND COUNCILS

The gigantic task of the program implementation of such a large scale could not have been achieved without the support of municipal corporations, councils and local administrations. BJS is grateful to all of them.

20. PARTNERSHIP WITH VARIOUS LOCAL VOLUNTARY ORGANIZATIONS AND GROUPS

BJS partnered with local voluntary organizations, self-help groups, social workers, NGOs, and other members of the society to contribute to this mission.

21. MEDIA SUPPORT

Popular news channel ABP Majha came forward to support Mobile Dispensary SEVA. They helped us in creating awareness and promoting Mobile Dispensary activities to citizens through their news channel. They covered the news about new launches, field visits and held live interviews with Shri Shantilal Muttha for generating awareness of the program.

उघडा डोळे, बघा नीट

Popular print media news outlets such as Sakal, Lotmat, Loksatta, Punya Nagari, Pudhari, Divya Marathi, Maharashtra Times, Kesari, and many other local newspapers featured the ground-level activities of Mobile Dispensary SEVA in almost all the districts of Maharashtra. The overwhelming media attention at city, taluka and district level helped us in reaching to a maximum number of population in Maharashtra.

ELECTRONIC NEWS MEDIA

MDS received extensive outreach through popular news channel outlets having a presence on YouTube platform. ABP Majha alone has over 6.31 M subscribers on YouTube. Several other news channels on YouTube listed below when combined together may have a minimum of 25 M subscribers.

SOCIAL MEDIA

BJS thoroughly utilized Facebook for creating COVID-19 awareness and promoting MDS activities. BJS Page “@BJSIndia” alone has over 30,682 followers. Between April 1st to June 30th 2020, we posted over 1,000 posts on our page which were again shared by hundreds of our followers, volunteers and various BJS Chapters spread across the country. In all, we reached more than an average of 2,54,800 people in just 3 months.

Over 1300 tweets were made related to MDS activities. Various administrative departments, senior government officials, politicians and famous personalities tweeted about MDS activities. In all, our tweets received over 3,00,000 impressions in 3 months.

More than 600 posts related to MDS activities were shared on Instagram.

BJS made maximum use of WhatsApp platform for creating awareness, sharing daily updates, and for communicating with volunteers and everybody who was involved in this project. We created over 700 WhatsApp posts in 3 months, which were shared in hundreds of groups of BJS network spread across the country.

YOUTUBE

Acknowledging the noble work carried out by Shri Shantilal Muttha and BJS-Force Motors Mobile Dispensary SEVA, ABP Majha allotted 4 slots of 30 minutes each on its TV channel for live sessions. These sessions received over 15000 viewership on their YouTube channel. BJS also posted many videos on its own channel.

22. OUR PARTNERS

23. OUR OBSERVATION: THE IMPACT OF COVID-19 ON CITIZENS

After working in COVID for nearly 3 months, BJS observed that the fear and panic about the virus have increased in the minds of people which is dangerous.

- People started to fear that if they are infected with the virus, they will not get a place in the hospitals.
- Frustration led to an increase in suicide cases and domestic violence.
- Citizens lacked authentic information and knowledge about COVID.
- Comorbid patients were panicked too.
- Due to the lockdown, the entire financial system collapsed hitting jobs, pay cuts, factory closures, loss of income and other related hardships. This affected the entire community of all age groups.
- No proper guidance was available about how to safeguard self except wearing masks, washing hands at regular intervals and social distancing.
- BJS observed these behavioural changes and the mindset of the people and realized that proper education needs to be given to people to smartly handle this situation by running appropriate awareness campaigns.
- Tackling the behavioural changes in the mind by informing people that the virus is not harmful, building confidence within them by telling them the real fact that henceforth we all will have to live with this virus and not lose our will power.

A large number of citizens queued up for getting screened

24. WAY AHEAD

BJS successfully implemented Mobile Dispensary SEVA during the 1st lockdown that was announced on 24th March 2020 and continued with the same enthusiasm during the 2nd as well as 3rd lockdown for 73 days. During this period, BJS also started a SWAB Centre in Pune.

After the end of the 1st lockdown, i.e., from 1st June when all the clinics and hospitals were opened, BJS decided to minimize Mobile Dispensary SEVA in some regions and shift its focus on Mission ZERO project.

THE BEGINNING OF PHASE II – MISSION ZERO (JULY 1ST, 2020)

The objective of the Mission ZERO project is to visit the containment zones/hotspots and conduct rigorous health checkups (fever and oxygen level screening) of citizens to identify the suspects and conduct their on-the-spot swab/rapid antigen tests with the help of local administration. It aims to bring down the number of COVID cases to zero in hotspots and containment zones in various cities, talukas and districts.

Mission ZERO is currently implemented in:

Maharashtra

Mumbai, Thane, Nashik and Aurangabad

Tamil Nadu

Chennai, Ooty, Erode, Sivakasi and Chidambaram

Karnataka

Bengaluru and Hubli

Mission ZERO is all set to begin in Pune too. An MoU has been signed between BJS, Force Motors and Pune Municipal Corporation on 20th July 2020.

The journey of Mobile Dispensary SEVA began with the help of strong support from Force Motors that further enabled the mission to expand and achieve numerous milestones in the last four months.

At BJS, we are highly grateful to Shri Abhayji Firodia and Shri Prasan Firodia for extending their generosity in supporting BJS' fight against COVID-19 in Pune and the rest of Maharashtra.

Our parents told us that there is some coronavirus playing outside to harm us, so they told us to stay home and wear this mask when we were going for health checkup at our doorstep. ★★
